### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

During a telephone conversation with Adam Cantor on 4/19/2006 a provisional election was made without traverse to prosecute the invention of a microneedle device, claims 1-18. Affirmation of this election must be made by applicant in replying to this Office action. Claims 19-40 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Sherman et al (US 2002/0020688). Sherman et al disclose in Figure 11 and paragraphs a microneedle device comprising a first major surface (140), a plurality of microneedles (182, 184) formed of polymers (paragraphs 0015 and 0016) comprising a base that is tapered to a flat truncated tip distal the base. Sherman et al further disclose in paragraphs 0075 and 0076 the flat tip capable of comprising an area of between 20 and 100 square micrometers and the base are capable of being 900 square micrometers or more, and the height base ration being capable of being 3:1 or more. Sherman et al also disclose in these paragraphs a microneedle device capable of having a cross-sectional area of no more than 25% of the base on a plane located at a distance of 0.98h from the base.

Art Unit: 3767

Sherman et al disclose in Figures 25 and 26 the method of using the microneedle device (531) comprising the step of contacting the skin (542), and forcing the microneedle device against the skin.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Catherine N. Witzak whose telephone number is (571) 272-7179. The examiner can normally be reached on Monday through Friday, 8-5 EST.
